Work Experience

OKLENT Cloud Technologies

February 2022 – Present

Front-end Engineer

OKLENT is a start-up that deals with providing and implementing ERP systems to small to medium-sized enterprises (SMEs).

- Developed and ported the main website to ERPNext to activate E-commerce and website modification features.
- Collaborated with 10+ clients based in ME region to implement front end services for their Odoo database.
- Setup production servers using Docker compose for Odoo and ERPNext, while also building custom Docker images.

Freelance

November 2017 – Present

Front-end Engineer

As a freelancer, I contracted with multiple clients to create, improve, and maintain their websites.

- Upgraded websites for clients by utilizing new front-end technologies.
- Participated in the development of an MVP that is targeting an audience of more than 200 businesses.
- Documented and demonstrated developer process for clients to increase efficiency in workflow.

Featured Work

Personal Portfolio (URL)

My personal portfolio, made with Nuxt. It includes all my published work and details the process behind each case.

Jockie Music (URL)

The most feature-rich Discord music bot, supporting sources like Spotify, Apple Music and more. It serves more than 20 million users to date.

About

I am Mohsen, but you can call me Bumbleboss. I work as a Product Designer / Front-end Engineer, sometimes both. When not working, I can be found gaming and binge-watching TV shows.

Education

Egyptian Russian University

Bachelor of Engineering - Mechatronics, Robotics and Engineering (2019 – 2024)
